Our greatest ENEMY: a disease

www.the-disease.kidds.org

Our greatest enemy is a disease, more dangerous than cancer, worse than the black plaque of earlier times, when its cause was still unknown. Close your eyes for 30 seconds and try to determine the name of this disease. Write the name down!

99 percent probability that you are wrong. You know the disease well, but consider it a marginal phenomenon. Because it can camouflage itself so well. "Terrible! But does not happen frequently, so it has little influence," you think. But that is wrong. It is a key factor that has had a negative impact on your life, from the beginning until today. 1000 difficulties you have encountered and are encountering today are related to this disease, because it occurs much more often than you think, in people you deal with. These people are hiding their disease in order to strike you out of their camouflage a., and also, in order not to be punished, b. "Only" 4 percent of people have this disease, but much more often you are in contact with them, indirectly or directly. Because people with this disease and whole groups of people with this

hereditary disease are looking for power posts to hit as many as possible and make them victims - indirectly and hidden, but effective -.

The richest people in the world are in the grip of the disease, using their billions to organize wars, WW2, coming WW3, contaminate our air, water, and soil with pollutants, via chemtrails out of high-flying aircrafts, and ingeniously exploit 1000 other opportunities to make damage and harm us. They even fund scientific laboratories, staffed with people who also have this disease and do nothing but to look for pollutants and harmful rays (they found 5G), with which they can 1. hit us inconspicuously and 2. hard. Activities that gradually increase damage, accumulating damages, are their favorites: they use the observation, that ordinary citizens only respond to sudden damage. Their particular attention is focused on means and methods to reduce the fertility of citizens and to further increase the large birth gates in Germany, England, France, Belgium, Holland and other countries. A government of a country, able to counteract to shut the gates, but doing nothing: how do you classify it? In the last 50 years, fertility has dropped by 80% and continues to decline hard. Clear results of the negative efforts, aiming to eradicate nations. They try Genocide from above!

What does drive these people? What is the name of the disease?

In intervals, they organize grotesque killer games such as MH370 (abducted, disappeared, inmates killed), MH17 (abducted, unloaded and reloaded with dead men from the MH370, then started again and shot down with a BUK, blaming Russia), or 9/11, controlled demolition of the Twin Towers, accusing then others (known as false flag operations) via their Trojan horses (as Bush did), via people with the disease whom they hold on power posts , invading then belligerently weak countries (Iraq). Inside the country, behind the passing front, they break up unprotected banks, get all the money out, load it on trucks and disappear with billions unseen in night and fog in direction Switzerland, where they own, since 1931, inmidst of Basel, a nearly unknown Mini-State and within a big building, the BIS-Bank of Rothschild-Rockefeller. There they deposite safely the robbed billions (biggest bank robbery ever) and have time to wash them. Proof: ex-insider. Billionaires, getting richer by some billions!

People of Superlatives: the richest people worldwide (Jacob Rothschild owns about one half of all money worldwide),

the world's biggest bank robbers and the sickest creatures in the world. On top of these three superlatives comes another one that leads us to the disease, to our biggest enemy, a disease, that has these people firmly under control: the biggest serial killers in the world: every week they torture secretly caught children in BIS, since 1931; under the lust cries of the present lustmurderers they torture them to death.

Lustmurderers! The hereditary lustmurderer-disease is our greatest enemy. It turns people into our enemies, arming itself with intelligence and energy to hit us. They, the lustmurderers, are the level1-victims of the disease. We, the citizens of the world, become her level2-victims.

Who has not been hit by WW2? The elders directly, the younger ones by his aftermath. Thought out in BIS, led and controlled from war headquarter BIS, WW2 was a killer game of lustmurderers, with Hitler, an illegitimate Rothschild from Vienna, RoRo-Trojan-Horse in Germany, and with G.D. Roosevelt, RoRo-Trojan Horse in USA.

The young generation in Germany does not know that they almost would not exist today anymore: the goal of the WW2 killer game of the RoRo lustmurderers was extinction of the German population. Therefore, the starvation war in 1945 until 1948. Its cancellation in 1948 was forced by US President Truman, when millions of Germans already had died from hunger (read the book of James Bacque "The Planned Death") and the rest of the German population was about to starve to death.

In addition to the deep black negative, there is also the positive in this world. Germany should set up more Truman stills in his honor. In many cities. Truman became Germany's savior in that period. But again lots of TrojanHorses of RoRo are sitting on highest posts in Germany throughout the power organs. RoRo continues to pursue its goal, now with other means.

The hereditary lustmurderer-disease, our biggest enemy, turns people into unscrupulous killers, for whom genocide is no problem either. On the contrary: that is great pleasure. Scientist could observe in special situations a burning desire of the big lustmurderer-group to commit genocide together: „, when person1 in several high placed sick power people lost control over their different person2 inside, person2 gliding out, controlling the body for some minutes (the sick part of their brains caught

control over their bodies fully). Several „persons2“ got glowing heads together, forgot the world, assuring each other their crying pleasure over coming WW3, again and a gain. An underground report from BIS-headquarter to the guerrilla- and TrojanHorse-army had stimulated the excitement inside „the crew“.

For them genocide is no problem. On the contrary: that is great pleasure. They want to live in the beautiful German country themselves.

Who? How many lustmurderers exist? Today about 300 million. In Germany more than 3 million. Most people are clueless, consider lustmurderers a marginal phenomenon. RoRo in Basel is only the orga-top of the widely scattered Hun people with roots Khasaria in the Caucasus and King Attila, the Hun, a lustmurderer nation, which travelled west with guerrilla technique, growing in number until today expositively. From 376 p.C until 451 n.C they attacked Europe openly, with a strong cavalry army. Later, they repeated the attack with a guerrilla army. That is still going on. Meanwhile, they have added an army of TrojanHorses, after successful infiltration of the power organs. In their host nations, groups of them are playing normal inhabitants and try to conquer power posts after power posts. Often they were successful. Guerrillas on power posts become TrojanHorses.

Lustmurderers have two defects in their brains, as an impact of two defects on a gene, whose seat ingenious scientists could locate. The origin of the disease is narrow and limited. That gives us possibilities. "Insight is the first step to recovery," says a well-known saying. If we understand the disease as a disease of humanity, then with the scientific insight we have taken the first step to recovery: to healing.

The hereditary lustmurderer-disease, our greatest enemy, transforms humans into double persons, outside person 1, inside person 2, a completely different person. Person 1 is friendly, looks normal, the perfect camouflage for person 2, the very different person, who laughs and laughs and laughs conducting joyful emotional saltos, in front of harm or death of others. Person 2 increases damage until the death of the victim, if she can do it with impunity. Otherwise she confines herself to limited damage, also with hidden expressions of joy (watch twitching corners of the mouth).

Where we have suspicion, that the disease is present in a power person, wanting to hit us, we can test her with the memory reader of Prof. Rykken

and recognize the disease, if present, immediately. Our great enemy naked. This goes fast and also provides information about sick colleges of the test person. A Trojan horse never comes alone. We always encounter networks of sick power persons. Using the memory reader means their k.o. In the past the sick people were barely recognizable. So they could build up negative power, And the lustmurderer-disease could hit us hard. Using the memory reader leads to k.o. of the enemy.

*Our enemy, the disease, beaten! Who comes to **CitizenPower** and helps to build the new world? Discouragement becomes courage. Question marks become exclamation marks! **We know the enemy.** Ultimately it is a **disease** that makes a small group enemies of the big group. We have the resources to encircle the small group, to take their political power, control of the economy and media, and the power of big money out of the hand and isolate them. Until the lustmurderer-disease is cured, we put the small group on a waiting track. As stated, there are good prospects for healing the disease. Before this background, courage and activity is needed from teams with sufficient numbers and strength. Are you brave and strong? Then come and help!*

CitizenPower a@jaaaa.net

Monsanto ist eine Firma, wo in der Spitze eine Gruppe von Lustmördern an Tod und Verderb arbeitet. Es ist unbegreiflich, dass die Menschheit sich das gefallen läßt, wo sie doch wirksame Mittel hat, das abzustellen. Man sollte die Monsanto-Spitze mit dem Memory-Reader durchkämmen und gefundene Lustmörder-Verbrecher ins Gefängnis stecken, statt ihnen immer neu zu gestatten, sich mit Geldsummen frei zu kaufen an Stätten, wo die Schäden zu eindeutig sind. Alle verschwommenen Schäden bleiben dabei ungestüht. Dasselbe gilt für die berühmte Pharma-Firma Bayer, die Monsanto aufgekauft hat. **CitizenPower** www.die-Krankheit.kidds.org . www.unser-groesster-Feind.kidds.org
Monsanto ist keine Einzellerscheinung. Moderne Lustmörder-Gruppen sind hoch spezialisiert, arbeiten in Nischen an schleichenden Schäden: Asbest, Chrom6, 5G, mit Gift versetzte Impfstoffe, Tabak-Industrie, Schul-Pillen-Medizin mit bewußt falscher Krebs-Theorie und Krebs-Behandlung. Bis sie nach Jahren oder Jahrzehnten erwischt und zum Aufhören gezwungen werden. Dann beginnen sie in einer anderen Nische dasselbe Spiel. Weil die Gesellschaft es zuläßt.
